

Comprehensive risk management services are included with every HealthCap[®] policy

Risk Consulting

ONSITE Risk Consult

Every HealthCap policyholder receives at least one focused risk consultation per year, onsite at the member facility.

Whether full-day or half-day, these personal risk consultations provide real value to our member facilities.

We will advise your facility on the effective implementation of consistent, high quality risk management practices relating to areas like wound management, fall prevention, medication management, in-service tracking, infection control, personnel file management, and documentation. You can direct the specific areas for review where you know you want support.

Survey PREP

For those qualifying policyholders who share their survey date with us, we will customize our full-day or half-day personal risk consultation visit to focus on preparing your building for survey.

Education

ANCC In-service

For those policyholders that qualify, HealthCap will provide accredited in-service education onsite to your facility staff.

Choose from over 70 accredited and useful topics, including:

- Fall Management
- Wound, Skin, & Nutrition
- Elopement Prevention
- Legal Documentation
- Medication Management
- Resident Rights
- Assisted Living Specific

HealthCap RMS is accredited as a provider of continuing education by the American Nurses Credentialing Center's Commission on Accreditation.

NAB Seminars

Policyholders receive complimentary registrations to our full-day regional risk management seminars. We bring together experts and facility leadership in a forum that provides NAB/NCERS and ANCC continuing education credits. Perfect for facility administrators, directors of nursing, and management.

National Association of Long Term Care Administrator Boards

Support

Unlimited Telephone Support

HealthCap policyholders always have free access to their risk management expert for phone and email consultations. Our risk managers have an average of 22 years experience working in the long term care setting, and are specifically trained to help you identify and mitigate areas of risk.

Best Practices & Video Library

Every HealthCap policyholder receives member-only access to our library of risk management best practices and video library covering a variety of operational and clinical functions: administration, background checks, disaster preparation; environmental safety, product safety, regulatory issues and resident care and safety.

RiskWatch[®] Newsletter

All HealthCap policyholders receive our quarterly newsletter which provides original articles on a broad range of senior care focused risk management topics. Legal, clinical, administrative, and other professionals help make HealthCap's RiskWatch[™] newsletter an exciting addition to your staff education.
