

SelfCap[®] LTC

A HealthCap[®] Product

SelfCap LTC is part of the HealthCap family of products that has provided insurance solutions to the long term care industry since 2001. With over 1,700 insured facilities throughout the country, HealthCap is a trusted name for long term care operations and the insurance professionals that serve them.

SelfCap LTC

SelfCap LTC is a segregated-cell captive insurance program designed so that larger long term care operations can retain more of their liability or worker's compensation risk.

SelfCap combines a sound financial structure with industry leading claims and risk management, allows greater control over liability or worker's compensation exposure, and provides access to the industry's leading experts.

SelfCap allows larger independent long term care providers, or groups of smaller providers, to capture underwriting profit, without the burden of joint-and-several liability.

Accessing SelfCap LTC

We rely on an exclusive group of independent insurance agents that are specialized in providing insurance solutions for the senior living industry. These agents possess integrity, energy, and unparalleled industry knowledge.

The SelfCap LTC difference

- Funding over time
- Fixed annual fee
- No up-front capital required
- No joint and several liability
- Rapid implementation - 7 days
- Industry leading claim and risk management
- Individual and affinity group applications
- Professional & general liability or large deductible workers' compensation programs
